Problem Statement

- Inadequate water sanitation can lead to the spread of waterborne diseases such as diarrhoea and cholera.
- Contaminated water sources and inadequate sanitation practices can pollute water bodies leading to ecosystem degradation and harmful to aquatic life.

Solution

- Data Analytics and algorithms
- Pattern and Trends
- Real-time update

Commercialization

- Marketing
- Prototyping
- Funding

Competitors

- Non-profit organisation
- Water utility companies

Uniqueness(Competitive Advantage)

- pH sensor
- Paper strip
- Laboratories

Target Market

- Communities and rural areas
- Non-profit and humanitarian organization
- Government agencies and policymakers
- Individual and households
